Powerchart mPage Upgrade – Settings and Preference Changes

The following components (marked 1, 2 and 3 in the image) of the mPage will have customizations and settings reset to default.

1. Any changes in position/rearranging of items in the Light Menu/Workflow Menu will be reset to default settings. You will be able to arrange them again as you like, and the settings should save between sessions.
2. Any changes to the arrangement of mPages will be cleared back to default settings. You will be able to arrange these again as well.
3. Any settings changed in the "Hamburger Menu" to hide components on the Light Menu/Workflow Menu will be reset to default settings. You can check/uncheck components again as needed and settings should save between sessions.

Settings made on the Quick Orders mPages should not be affected.

Changes in MyExperience - Residents Only

The screenshot shows the MyExperience web application interface. It features three main sections: 'My Available Positions', 'My Default Organizer View', and 'My MPages Selection'. A red-bordered box is overlaid on the 'My Default Organizer View' section, containing the following text:

MyExperience (your "homepage" and position) settings will also be cleared. You will need to re-select your preference if you have multiple options available.

The 'My Available Positions' section lists various roles such as Ambulatory: MA, Ambulatory: RN/LPN, Appeals Case Manager, Athletic Trainer, Audiologist, Audiologist Tech, BEH RN, BEH Tech, BEH Therapist, BEH Therapy/Psychology Student, CPM Reg/Sched, Cardiology: ECG Tech, and Cardiology: Technologist.

The 'My Default Organizer View' section lists options like Physician Handoff, Message Center (selected), Patient List, Dynamic Worklist, MyExperience, and eCoach.

The 'My MPages Selection' section shows a 'For Tab: Ambulatory Nurse Summary' and a list of medical specialties including Allergy/Immunology View, Ambulatory MA Summary, Ambulatory Workflow, Audiology View, Cardiology View, Dermatology View, Endocrinology View, Gastroenterology View, General Surgery View, Gerontology View, Hospitalist View, and Infectious Disease View.
