New Discern Alert for AMB NDC's

Ambulatory Medications and Immunizations require an 11-digit NDC in the **AMB NDC** field. If an 11-digit NDC isn't entered, a Discern Alert appears after the user signs the form (green checkmark).

Charting for: ZZTEST, MATT

pneumococcal 13-valent conjugate vaccine
0.5 mL, IntraMuscular, Susp-Inj, Vaccine, First Dose: 03/20/19 7:53:00 EDT

*Performed date / time : 03/20/2019 0754 EDT

*Performed by : Cerner Test, Ambulatory: Care Manager C

Witnessed by :

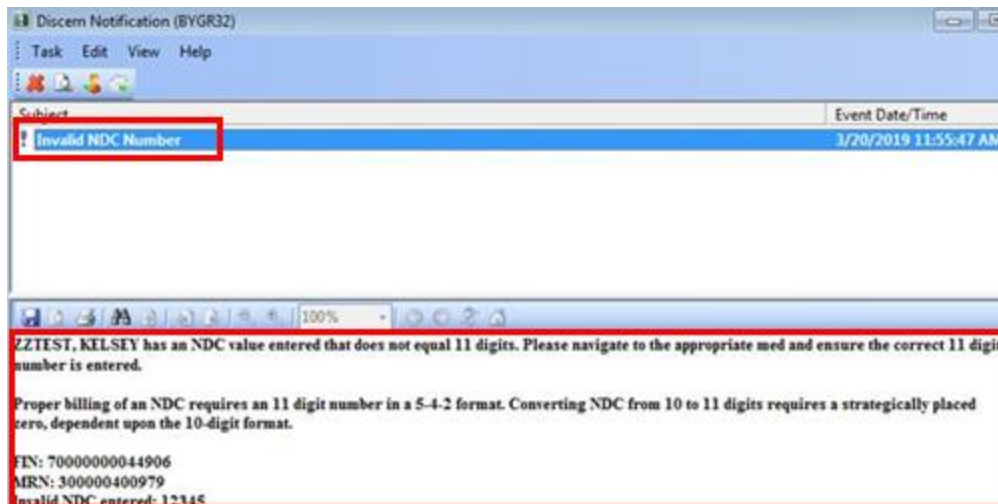

Consent Obtained: Consent obtained [Trend](#)

AMB NDC: 1234567891

An example of the **Discern Alert** is below. The subject of the alert is "Invalid NDC Number".

If an error was made when entering the NDC and the user receives the below alert, it is best practice to address the alert and fix the error in real-time.

Instructions to **Modify** an NDC are included on Page 2.

MODIFYING VACCINES OR MED ADMIN

1. Validate the correct patient/FIN is selected.

2. Select **MAR** from the **Menu Bar**.

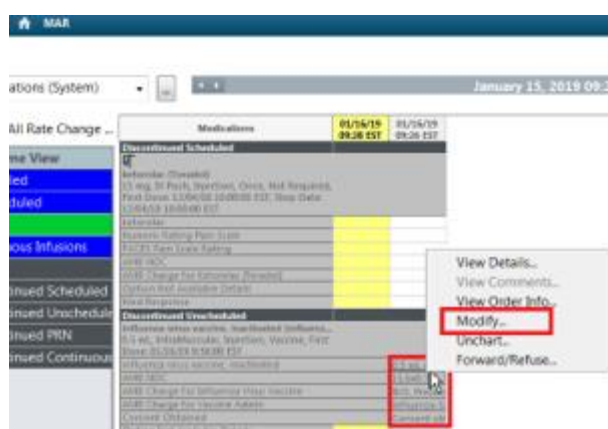

3. Ensure your **date filter** is set appropriately so that the medication admin / immunization displays appropriately.

4. Find the **Date Column** that corresponds with the applicable Immunization/ Medication Admin.

5. **Right-click** and select **Modify**.

- *Note: For the **Modify** option to be available, you must right-click within a cell that contains charted details. Right-clicking anywhere else in this window will not provide you with the **Modify** option.*

6. The **Medication Administration Window** prompts, allowing you to modify as needed.

7. Make the necessary changes to NDC and **Sign** the form.

8. Click the **Discern Alert** in the lower right-hand tray of your computer (red flashing icon).

9. Click the **Resolve** link within the Discern Alert.
