Birth Sex vs. Administrative Sex

ATTENTION PATIENT ACCESS

Objective: To explain the difference between what information should be inputted into these two fields

Birth Sex vs. Administrative Sex

A new field entitled "Birth Sex" has been added in Cerner in addition to the "Administrative Sex" field that is already there. The **Administrative Sex** should be the gender listed on the patient's driver's license. The **Birth Sex** should be recorded as the answer to this question that you need to ask the patient:

"Your driver's license shows your gender as <female/male>...was this also your gender at birth?"

NOTE: *The question should be asked exactly as written.*

PMOffice/Win32

When initiating and performing any of the following actions/tasks, the 2 fields will be required: **Pre-Reg** conversation, **Registration** conversation, **Newborn Quick Reg** and **Newborn Modify**.

The screenshot shows the 'PreReg' software interface. At the top, there are fields for Last Name (DSSS), First Name (AVERY), Middle Name, Preferred First Name, Previous Last Name, and Suffix. Below these are fields for Administrative Sex and Birth Sex, which are highlighted with a red box. Other fields include Social Security Number, Reason For No SSN, Date of Birth, Age, Medical Record Number, and Estimated Patient Responsibility (\$0.00). The interface also includes tabs for Patient Information, Encounter Information, Guarantor Information, Insurance Primary, Insurance Secondary, Insurance Tertiary, MSP, Insurance Summary, and Additional Contacts. At the bottom, there are 'Complete' and 'Cancel' buttons, and a status bar indicating 'Ready' and 'BUILD REGCLERK 11/15/2018 2:00 PM'.
