

## Acute vs. Maintenance Medication Therapy Type

5/15/2019

The settings on discharge medications will be updated on 5/22/19 to use the Cerner drug database designations of Acute and Maintenance Medications. Medications designated as Acute require a Stop Date.

### Example: Discharge Med Reconciliation

When creating a new prescription from an existing inpatient order, meds designated as Acute will no longer default with 30 day dispense quantity.

Details for: **HYDROcodone-acetaminophen (Norco 5 mg-325 mg oral tablet)** Send To: HP LaserJet 4200/4300 PCL6 (from

\*Dose: 1 tabs    \*Route of Administration: Oral    \*Frequency: Q4H    Duration:    \*Dispense: 0 tabs    Refill: 0

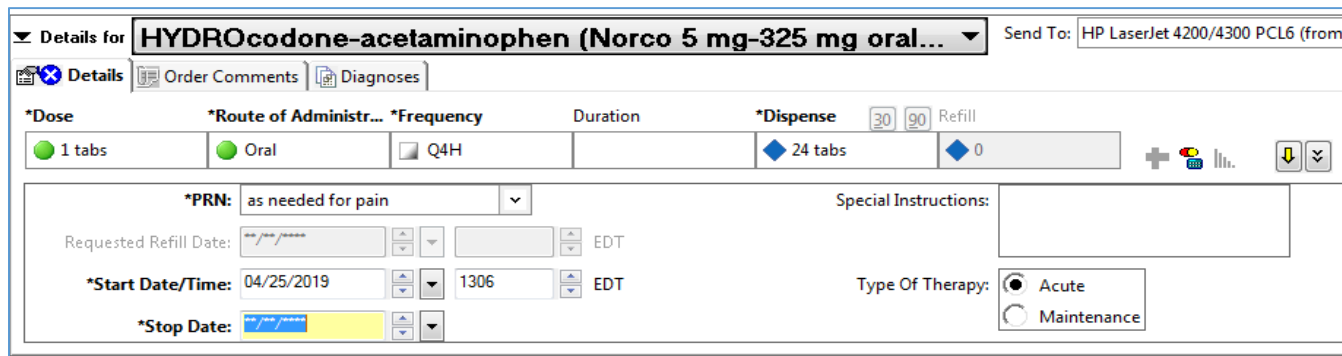

\*PRN: pain, moderate (4-6 on pain s...    Special Instructions:

Requested Refill Date:    EDT

\*Start Date/Time: 04/25/2019 1309 EDT    Type Of Therapy:  Acute  Maintenance

\*Stop Date:    EDT

**Example: New Prescription for Norco 5-325 with the order sentence: 1 tablet Q4H PRN as needed for pain, #24**  
Order defaults with an **Acute** therapy type and requires a Stop Date.

Details for: **HYDROcodone-acetaminophen (Norco 5 mg-325 mg oral...)** Send To: HP LaserJet 4200/4300 PCL6 (from

\*Dose: 1 tabs    \*Route of Administration: Oral    \*Frequency: Q4H    Duration:    \*Dispense: 24 tabs    Refill: 0

\*PRN: as needed for pain    Special Instructions:

Requested Refill Date:    EDT

\*Start Date/Time: 04/25/2019 1306 EDT    Type Of Therapy:  Acute  Maintenance

\*Stop Date:    EDT

### The Stop Date requirement can be fulfilled by:

- Entering the duration of therapy from the drop down list (e.g. 3 days) & modifying if needed
  - Note: if prescribing a scheduled med, the duration will also calculate the dispense quantity
- Entering an actual Stop Date
- Changing the Type of Therapy from Acute to Maintenance
