Updates to NEPH Hemodialysis Power Plan

On Tuesday, August 21st, there will be changes to the NEPH Hemodialysis Power Plan. The plan will be multi-phased, unlike the single phase currently in ONE McLaren.

1. The first phase of the Power Plan is "Dialysis Notification." The only order in this phase is the Hemodialysis order. This phase will auto-initiate which will allow the dialysis department to be notified of the request when the treatment is planned.

NEPH Hemodialysis, Hemodialysis Notification (Initiated Pending)					
⊿	Procedures				
$\mathbf{\nabla}$	💙 Hemodialysis	▼	Select an order sentence		

2. The second phase of the Power Plan is "Hemodialysis Orders." This phase contains all of the orders from the current Power Plan and also includes orders for priming and line patency. This phase will default to a planned state and the dialysis staff will initiate the orders when the patient arrives for the treatment. MGL Dialyzers have also been added and an "Other" response will be available for the Ultrafiltration Fluid Balance – Hemodialysis order.

NFPH Hemodialysis. Hemodialysis Orders (Planned Pendino)							
A Patient Care							
	Vital Signs	every 15 min					
	🕈 Weight	Once					
	No Blood Pressure (BP) or Veno-Arterial Punctures	 Arterial Blood Fistula, Left Upper extremity restriction 					
	🖄 Dialysate Temperature						
	Hemodialysis Treatment Time	Other (please specify)					
M 🛛 🔀 🕻	Dialyzer	 Select an order sentence 					
	Dialysate Flow	Flow Rate: 100 mL/min (6,000 mL/hr)					
	2 Blood Pump	Flow Rate: 100 mL/min (citrate)					
M 🕺 🕻	Dialysis Access Site	 Select an order sentence 					
	Needle Size	Needle Size: 15 Gauge					
v 🖸 🖸	2 Ultrafiltration Fluid Balance - Hemodialysis	 Select an order sentence 					
	Dialysate Solution	Sodium: 138 mEq/L, Potassium 2 mEq/L, Bicarbonate 35 mEq/L Calcium: 2.5 mEq/L					
⊿ Continuous Infusion	ns						
	3 Sodium Chloride 0.9% (Sodium Chloride 0.9% Bolus)	1,000 mL, IV Bolus, Injection, Once, Infuse Over 1 hr To prime Extracorpal Circuit					
⊿ Medications							
Priming Solutions							
	heparin (heparin 1000 units/mL injectable solution)	 500 units, IV Push, Injection, Once To prime Extracorpal Circuit; DIALYSIS STAFF TO ADMINISTER 					
Line Patency							

3. Providers: If you have the NEPH Hemodialysis Power Plan currently saved to your Favorites, it will be removed and you will need to add the new Power Plan to your list. It has the same name, but will contain the updated components.

DOING WHAT'S BEST.

NEPH CRRT Continuous Renal Replacement Therapy						
NEPH Hemodialysis Add to) Favorites					

2. If you want to save the new NEPH Hemodialysis Power Plan and modify it to meet your standard orders, order as you would normally do and select the order sentences you would like for the Favorite. From the list of Power Plans, right click on the NEPH Hemodialysis Plan Name and select "Set as My Favorite."
