## One McLaren Wave Two Central Performing Locations on All Diagnostic Orders

Beginning today, Monday August 31<sup>st</sup>, 2020 the Cerner team will be activating the Central performing locations on all diagnostic orders as part of the Central Scheduling back fill efforts. Providers and other users will see these locations when placing future diagnostic orders and when scheduling these appointments.

Lansing providers should not select any Central performing location until the Central Go Live of October 3<sup>rd</sup>, 2020

These build changes should not have any impact to the existing Lansing Cerner build, and you should continue to follow your current workflow. If there is an unanticipated impact to your workflow, please report the issue to the National Service desk at (810) 424-8400.

Examples of where these Central locations will be visible:

The screenshot shows a Cerner interface for a diagnostic order titled "Details for CT Abdomen and Pelvis w/ Contrast". The "Performing Location" dropdown menu is open, showing a list of locations: CNT McLaren Central Hospital, Greater Lansing Radiology, LAN McLaren Imaging Lake Lansing (LN05), OAK Clarkston Diag Radiology (OK14), OAK McLaren Oakland Hospital, OAK Oxford (OK06), and Performed Outside McLaren. The "CNT McLaren Central Hospital" option is highlighted in blue. Other fields visible include "Requested Start Date/Time" (08/31/2020 12:37 EDT), "Priority" (Routine), "Reason for exam", "Consulting physician", "Pregnant" (Yes/No), "Order for future visit" (Yes/No), "Exam to be performed outside organization?" (Yes/No), "AUC Score", "AUC Acknowledgement Reason", and "AUC Order Adherence Modifier".
