Ambulatory: New Dynamic Worklist Conditions

May 17, 2021

New Dynamic Worklist Conditions Overview

Enhancement: Two new options have been added to the Conditions category within the Dynamic Worklist. **Pulmonary Hypertension** and **Pulmonary Arterial Hypertension** options are available and will allow users to create a worklist to track patients that have one or both of these conditions.

Positions Impacted: All Ambulatory Providers and Staff.

New Worklist Conditions

- When creating or modifying a worklist from the **Dynamic Worklist** button on the Toolbar:
 - Under the **Criteria** section, select the **Conditions** category.
 - Here users will be able to select **Pulmonary Hypertension** and/or **Pulmonary Artery Hypertension**.
