Ambulatory: New Albumin Urine/Creat w/Ratio POC Order

February 20, 2024

## New Albumin Urine/Creat w/Ratio POC Order in PowerChart Overview

**Addition effective 2/20/24:** The new Albumin Urine/Creat w/Ratio POC Order is now available in PowerChart.

- **New Order: Albumin Urine/Creatinine Othr Source w/Ratio POC 82044/82570**
  - Place this order when the Albumin, Creatinine and Ratio will be performed and resulted.

This order will generate a task for Clinical Staff to document the result, which will allow the appropriate charges to be applied to the patient's account.

**Prior to this change:** Only one order was available in PowerChart, **Albumin Urine Microalbumin Semiquantitative POC 82044**. When this order was used, a task generated for Clinical Staff to document the result. The Powerform used for the documentation contained fields to enter the Albumin, Creatinine and Ratio result, but the charge for the ratio was not being applied to the patient's account.

**Positions Impacted:** All Providers and Clinical Staff who perform this testing in-office.

## New Albumin Urine/Create w/Ratio POC Order in PowerChart Workflow

- 1) Search and select the **Albumin Urine/Creatinine Other Source w/Ratio POC 82044/82570** order for the patient.
- 2) Clinical Staff will document the results via the task on the Task List.
- 3) The form that displays for the **Albumin Urine/Creatinine Other Source w/Ratio POC 82044/82570** will contain required fields for staff to document all the Albumin, Creatinine and Ratio.
