Ambulatory: Notification Toolbar Enhancement

July 22, 2022

## Notification Toolbar Enhancement Overview

**Enhancement:** effective **7/26/22**, the **Notification Toolbar** will now be available in PowerChart for Front Office Staff. This enhancement will provide a quick and easy way for staff to see how many Reminders, Notify Receipts, and/or Messages are pending in their Message Center, without having to access the Message Center itself. Please see the instructions below for further details.

**Ambulatory Positions Impacted:** All staff in a Reg/Sched Clerk – Clinic (PAR) position.

## Notification Toolbar in PowerChart

1) In PowerChart, the **Notification Toolbar** will display at the top of the screen. Items that display here serve as an alert and provide the following information:

- **Reminders:** the total number of Reminders that are pending in the Message Center.
- **Notify Receipts:** the total number of Notify Receipts that need to be reviewed in the Message Center.
- **Messages:** the total number of Messages that are pending in the Message Center.

2) Users can easily select one of the buttons on the toolbar to route to that location within the Message Center.

- **Note:** A Reminder will appear in Red Text on the Reminders list when Overdue.
