Ambulatory: Health Maintenance HIV Screening Frequency **December 17, 2021**

Health Maintenance HIV Screening Overview

Enhancement #1: The frequency of the HIV Screening Recommendation within the Health Maintenance component will be changed from every twelve months to once. Once this has been met, the recommendation will be satisfied and have no future instances.

Enhancement #2: Users will have the ability to choose an HIV Screening – High Risk recommendation with a yearly time interval for patient's that require testing on a regular basis. Users may alter this time interval depending on the needs of the patient.

Both enhancements will be available for users on **12/20/21**.

Prior to Enhancement: There was only one option for the HIV Screening recommendation with a yearly time interval.

Positions Impacted: All Ambulatory Provider and Clinical Staff positions.

Health Maintenance HIV Screening Example

Below is an example of the HIV Screening options that will be available within Health Maintenance.
