ARUP - New Reference Lab – PathNet Required Forms Process

With the PathNet implementation, McLaren has switched to a new reference lab named ARUP for some testing. The attached spreadsheet contains links to the new forms. These pdf forms need to be completed (some can be done electronically), printed, and sent with the specimens. These forms replace any forms that may be in use at your practices today for these tests.

The project team is also working to associate these forms on the orders within Cerner through reference text with hyperlinks that will open the forms. Below are screenshots of how to utilize the links within Cerner.

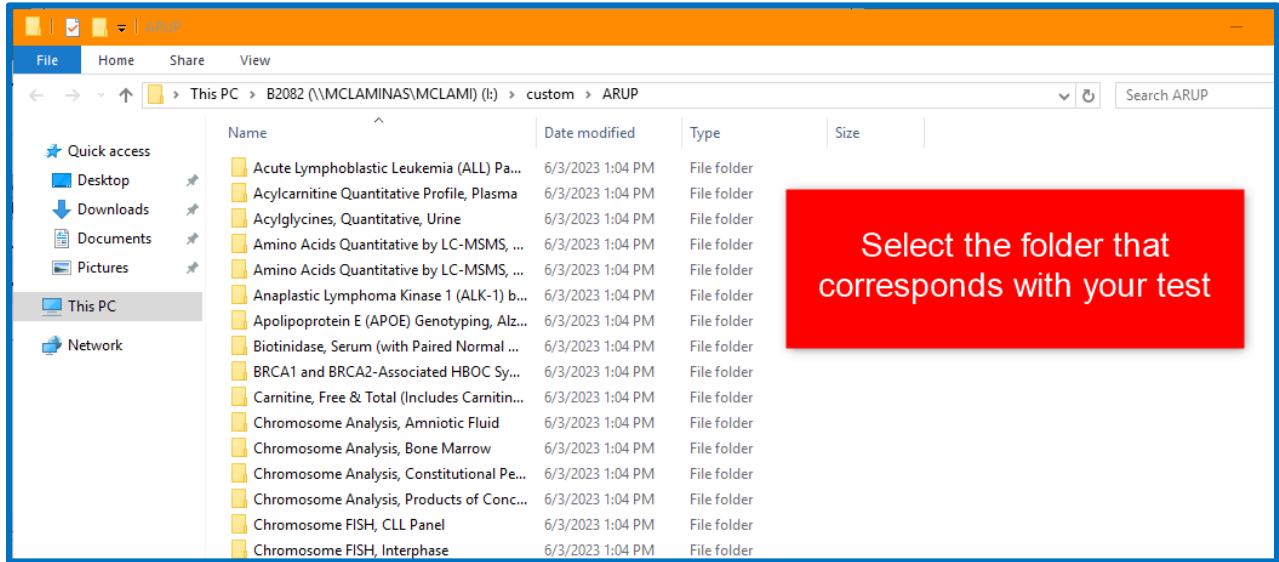

Each hospital lab has been provided starter kits for the new laboratory. Please reach out to your subsidiary lab managers to obtain supplies for your department.

When ordering these special send out tests, the following alert will fire to inform you there are required form(s) that needs to accompany the specimen

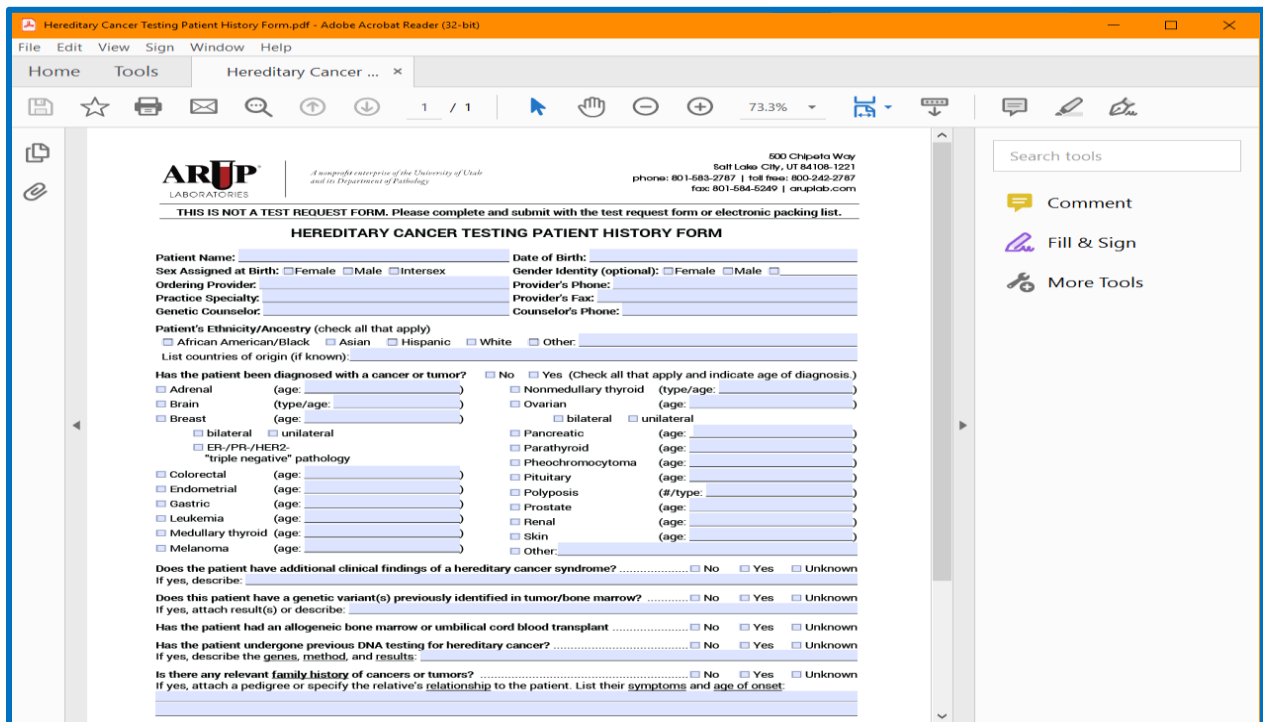

The screenshot shows a Cerner alert window titled "ARUP Required Form(s)". The window has an orange header bar with the text "Discern: (1 of 1)". The main content area features the ARUP Laboratories logo on the left and the title "ARUP Required Form(s)" in large red font. Below the title, there is a text box with the following instructions: "The reference lab requires an attached form. Click on the button below, open the folder for the test and complete all forms in the folder." This is followed by a list of instructions: "For each form, please: 1. Complete the online form if document allows text entry. Otherwise, complete the form after printing. 2. Print 2 copies. 3. Scan 1 copy into the chart, and send 1 copy with the specimen." A large red button with white text says "Click here to access the forms". At the bottom left of the window, there is a button labeled "ARUP Forms" which is highlighted with a red box and a red arrow pointing to the red button above. At the bottom right, there is an "OK" button.

Here is an example of how a form will look. Each form will be unique to the type of test ordered.
