Ambulatory/Antepartum Intake Form Enhancement

January 14, 2022

## Ambulatory/Antepartum Intake Form Enhancement

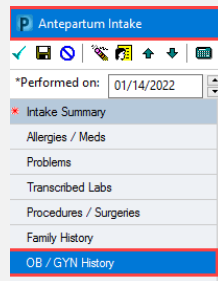

**Change:** Effective 1/13/2022, Clinical staff will be able to select Depo Provera as a Contraception Type within the Menstrual History Section of the Ambulatory/Antepartum Intake Forms.

**Prior to Change:** This option was not previously available within the Contraception Type drop-down.

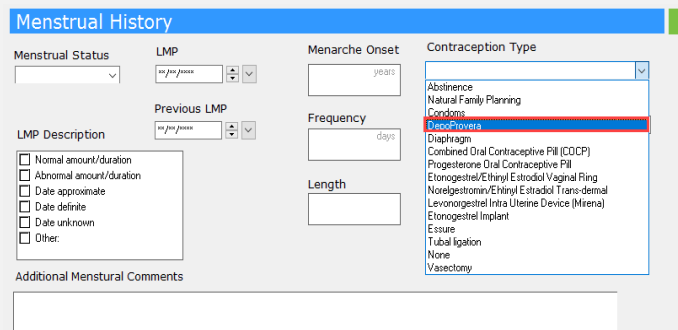

**Positions Impacted:** All positions.

## Menstrual History Contraception Type Drop-Down

- 1) Navigate to the **OB/GYN tab** of the Ambulatory and Antepartum Intake Form.

- 2) From the **Menstrual History** section, select **DepoProvera** from the **Contraception Type** drop-down.

The screenshot shows the 'Menstrual History' section of the form. It includes fields for Menstrual Status, LMP, Previous LMP, LMP Description, Menarche Onset, Frequency, Length, and Contraception Type. The Contraception Type drop-down menu is open, showing a list of options with 'DepoProvera' highlighted in red.
