Ambulatory: Antepartum Intake Form Enhancement

December 20, 2022

Antepartum Intake Form Enhancement Overview

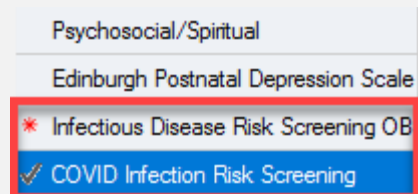

Enhancement: Effective 12/21/22, the Infections Disease Risk Screening OB and COVID Infection Risk Screening sections will be removed from the Antepartum Intake Form. These sections will be replaced with the ID Risk Screen section (tab), which combines the ID Risk Screening and COVID related questions and makes it easier for users to document all of the information in one section.

Prior to Enhancement: Users had to document the applicable information by accessing two different tabs.

Positions Impacted: Women's Health Clinical Staff.

Antepartum Intake Enhancement

Prior to the enhancement, users had to documented COVID and Risk Screen information in two separate sections/tabs within the form.

After the enhancement, users will access one section of the form to document COVID and Risk Screen information.
