

Birth/Legal Name - Newborns

Reminders & Helpful Hints

The naming convention used across ONE McLaren for a newborn born within a facility is based on the mother's given name and remains the same throughout the length of stay.

Helpful Hints

- ✓ The naming convention in the hospital is based upon the birth mother's legal name they give at time of admission. For example, Zztest, Momgirl for a female newborn of patient, Zztest, Mom.
- ✓ Within a few days of discharge the newborn's name is updated to reflect the legal name given. These updates are made outside of the Labor and Delivery units.

Ambulatory Site Scheduling

- ✓ For immediate follow up appointments in a McLaren ambulatory clinic please note that the name may still be with the hospital naming convention.
 - a. Search for the newborn using the hospital naming convention. If this does not trigger results, then search by the legal name of the newborn.
 - b. The appointment should be scheduled under the name searched in above.
 - c. When the hospital updates the newborn's name based on Birth Certificate/Social Security Card application all appointments will updated to reflect.
