<<CV Summary Tab Name Change to Perioperative Summary >>

The “CV Summary” and the “Perioperative Summary” are the same tabs with different labels. They bring users to the same documentation. As a result of several users entering requests for access to the “Perioperative Summary” tab, we are changing the label on the “CV Summary” tab to standardize them to the more commonly used “Perioperative Summary”.

This change impacts those with the access types below:

- SurgiNet: CathLab/IR Nurse
- RadNet: Supervisor
- Cardiology: ECG Tech
- Exercise Therapist
