Coming Monday 1/17/22

Isolation Icon Enhancement Capacity Management

To enhance the ability to identify types of isolation at a glance in Capacity Management, the isolation icons will be updated to a color-coded style as shown below. Each type of isolation that can be ordered in Cerner will be assigned its own color. These color-coded icons will also display on the iPods.

As always, hover over the isolation attribute in Capacity Management to view more information.

Note: This change will not apply to the nurse unit CareView boards. They will continue to display the generic green isolation icons as before, until we reach an upgraded code level with our system.

MCLAMI_CMPROD_10 : CareAware iCommand™ 6.3.1-b191002
