Ambulatory: Dosing Weight Field on Amb Intake Forms

May 11, 2023

Dosing Weight Field on Ambulatory Intake Forms Overview

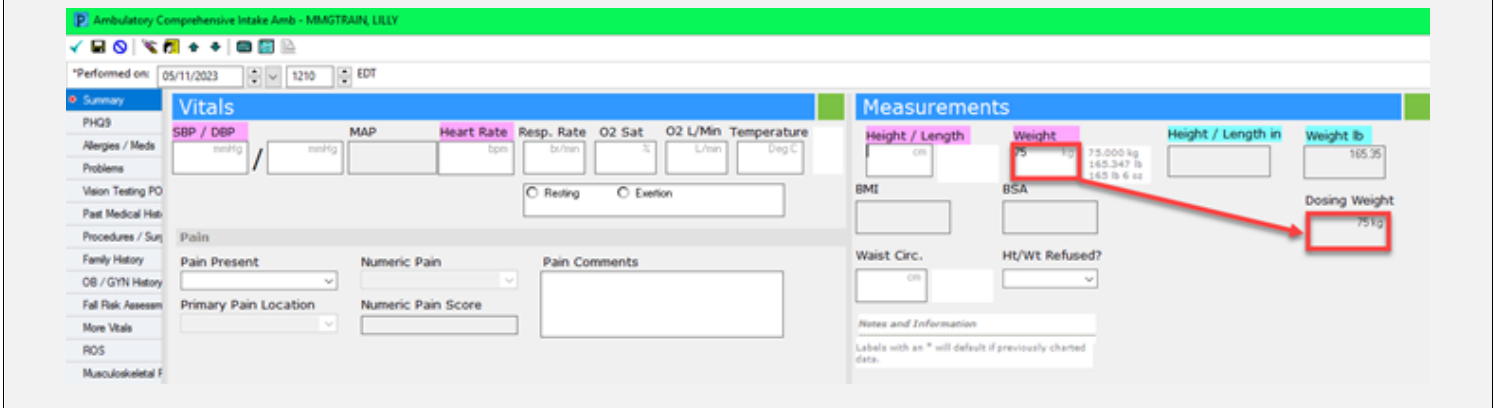

Enhancement effective 5/11/23: The Dosing Weight field has been added to Ambulatory Intake forms. This field will auto-populate with the dosing weight based on the information entered in the Weight field. Users will not have the ability to modify this field.

Adding the dosing weight field to the Intake forms will allow the dosing calculator to function appropriately when providers are prescribing weight-based medications.

Intake Forms Impacted: Ambulatory Comprehensive Intake Amb, Ambulatory Quick Intake Amb, Ambulatory Pediatric Care Intake, Urgent Care Intake Amb, Vital Signs & Allergies Check – AMB, Antepartum Intake.

Dosing Weight Field on Ambulatory Intake Forms

- 1) The **Dosing Weight** field will display within the **Measurements** section of the Intake form.
 - a. This field will auto-populate with the dosing weight based on the information entered in the **Weight** field.

The screenshot shows the 'Measurements' section of the intake form. The 'Weight' field is highlighted with a red box and contains the value '75 kg'. A red arrow points from this field to the 'Dosing Weight' field, which is also highlighted with a red box and contains the value '75 kg'. Other fields in the 'Measurements' section include Height / Length, Height / Length in, Weight lb, BMI, BSA, Waist Circ., and HT/Wt Refused?.
