Ambulatory: New Albumin Urine/Creat w/Ratio POC Order

January 31, 2024

New Albumin Urine/Creat w/Ratio POC Order in PowerChart Overview

Change effective 2/6/24: There will be a new Albumin Urine/Creat w/Ratio POC Order available in PowerChart. The Powerform used to document the existing Albumin Urine Microalbumin Semiquantitative POC order will also be modified to remove the Creatinine and Ratio fields as described below.

Order Addition and Existing Order Modification

New Order: Albumin Urine/Creatinine Othr Source w/Ratio POC 82044/82570

- Place this order when the Albumin, Creatinine and Ratio will be performed and resulted.

Existing Order: Albumin Urine Microalbumin Semiquantitative POC 82044

- Place this order when **only** the Albumin will be performed and resulted.
- The Powerform for this result will be modified to remove the Creatinine and Ratio fields.

Each order will generate a task for Clinical Staff to document the result. This will allow for the appropriate charges to be applied to the patient's account when the corresponding test is performed.

Prior to this change (current state): There is only one order available in PowerChart, **Albumin Urine Microalbumin Semiquantitative POC 82044**. When this order is used, a task is generated for Clinical Staff to document the result. The Powerform used for the documentation contains fields to enter the Albumin, Creatinine and Ratio result, but the charge for the ratio is not being applied to the patient's account.

Positions Impacted: All Providers and Clinical Staff who perform this testing in-office.

New Albumin Urine/Create w/Ratio POC Order in PowerChart Workflow

- Search and select the appropriate POC order that is need for the patient:
 - Albumin Urine/Creatinine Other Source w/Ratio POC 82044/82570
 - Albumin Urine Microalbumin Semiquantitative POC 82044

- Clinical Staff will document the results via the task on the Task List.

- The form that displays for the **Albumin Urine/Creatinine Other Source w/Ratio POC 82044/82570** will contain required fields for staff to document all the Albumin, Creatinine and Ratio.

- The form that displays for the **Albumin Urine Microalbumin Semiquantitative POC 82044** will contain a field for staff to document only the Albumin result.
