Ambulatory: Office Clinic Note Enhancements

March 19, 2024

## Office Clinic Note Enhancements Overview

**Enhancements effective 3/21/24:** We are excited to share enhancements that will be made to specific Office Clinic Notes. These enhancements will satisfy requests that have been made by multiple Providers for quite some time and will streamline how documentation appears in their note.

**Positions Impacted:** All Provider positions that utilize the office visit note templates listed at the end of this flash.

Areas of enhancements include:

Enhancement	Current State	Post Enhancement
Orders	Orders that are placed during the visit appear in the Assessment and Plan section under the diagnosis that they were associated to.	Orders placed on the encounter will display under specific headers based on the order type (Laboratory, Radiology, Referrals, Other Orders, Charge Orders).
	Orders placed during the visit only pull into the note if the note is created within 24 hours.	Orders placed on the encounter within the past 30 days will pull into the note.
	Orders only pull into the note if they are in an Ordered, Future, or In-Process status.	Orders will also pull into the note if they are in a Completed status.
Order Types	POC orders placed on the encounter do not pull into the note.	POC orders placed on the encounter will now pull into the note.

Current State	Post Enhancement
<p><b>Assessment/Plan</b></p> <p>1. Bee sting reaction</p> <p><b>Ordered:</b> Referral - Ambulatory, Medical Service: Allergy and Immunology, Reason: Allergies, Refer To: Provider Not Specified, AFF Allergy &amp; Asthma Physicians AS, Rochester Hills, 48307., Start: 03/19/24 10:43:00 EDT, Bee sting reaction XR Chest 2 Views</p> <p>2.
