Pathology Results Released to the HealtheLife Patient Portal

December 13, 2023

## Pathology Results Released to the HealtheLife Patient Portal Overview

**Effective 12/15/23:** To meet regulatory requirements, the Pathology reports for the orders below will route to the HealtheLife Patient Portal and be viewable to patients. These reports will open in a pdf format and can be downloaded by the patient if needed.

Pathology Order	Correlating Pathology Report
• Pathology Consultation Request	• Pathology Consult Report
• Pathology Bone Marrow Request	• Bone Marrow Report
• Pathology Flow Cytometry Request	• Flow Cytology Report
• Pathology Gyn Request	• Gyn Cytology Report
• Pathology Non-Gyn Request	• Non-Gyn Cytology Report • Non-Gyn Pathology Report
• Pathology Tissue Request (Surg)	• Surgical Pathology Report

When staff are performing scanning workflows, it is very important that the appropriate document type (folder) is chosen when filing documents into the patient's chart. Documents filed under Pathology document types will be viewable by the patient via their patient portal.

This is an enterprise change and will apply to both the Acute and Ambulatory space.

The patient will access their HealtheLife patient portal to view/download Pathology reports as described below.

## Pathology Results Released to the HealtheLife Patient Portal (Patient Perspective)

1) Patient logs into their patient portal by entering their **Email Address/Username** and **Password**.

a. Click **Sign In**.

2) From the Dashboard, the patient will select the **Health Record** section and choose **Pathology** reports.

# Cerner Flash
