Pediatric Viewpoint and Mpage Enhancements

Pediatric Viewpoint and Mpage Enhancements Overview

Enhancement effective 12/14/23: Pediatric Providers will now have one viewpoint to see both their Inpatient and Ambulatory Workflow pages. This will eliminate the need to change viewpoints while working between the Ambulatory and Acute space. Multiple Mpage View titles/names will also be updated so users can find items in an easier manner. Please note that the Mpages will contain the same content, only the titles/names will be updated. Mpage views that were not needed or contained duplicate information will be removed.

Below are the current and new Mpage titles for comparison.

Title of Current Mpage View	Title of New Mpage View
Demographics	Demographics
Discharge	Discharge
Quick Orders	IP PEDS Quick Orders
Pediatric INPT Workflow and Admit Workflow	IP PEDS Workflow
Neonate Workflow	Neonate Workflow
Pediatric Orders	OP PEDS Quick Orders
Outpatient Workflow	OP PEDS Workflow
Patient Summary/Inpatient Summary	PEDS Summary
Video Visits	Video Visits
Mpages View	Will be removed – duplicate information
Future Orders	Will be removed – can be found on Peds Summary

Advanced Practice Providers (APP) will have one view to select in **My Experience**. This view will be called the Pediatrics View.

Prior to this change: Providers needed to switch their view between Ambulatory and Inpatient to locate the appropriate workflow pages. APPs needed to change their My Experience between the Pediatrics AMB View and Pediatrics Acute View to find the desired workflow pages.

Positions Impacted: Physician – Pediatrician; Advance Practice Providers that work in Peds.

Please see the examples below for more information.

Pediatric Viewpoint and Mpage Enhancements

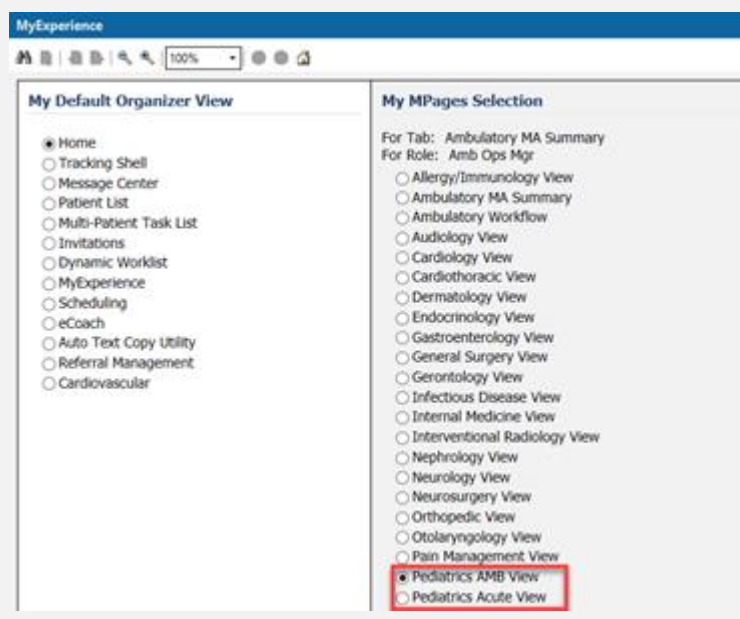

Pediatric providers and APPs will see the below enhancements in Cerner PowerChart.

My Experience Mpage Selection

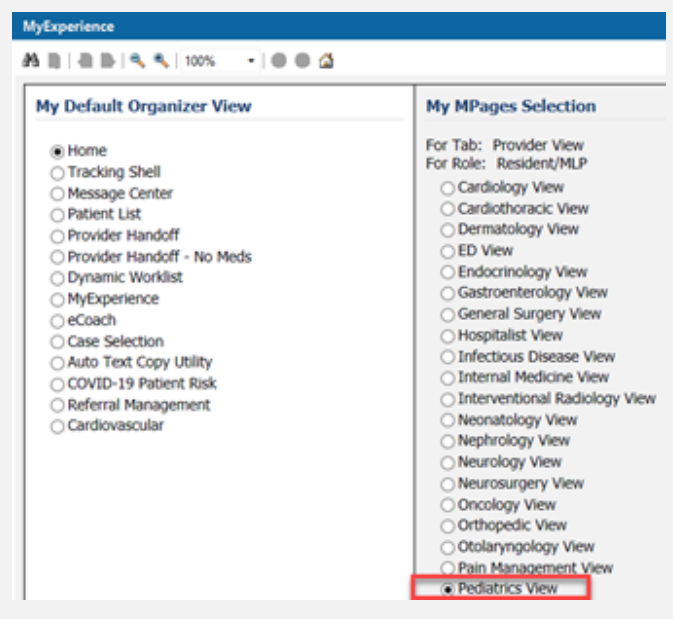

Currently: APPs that work in Pediatrics have two separate Mpages in My Experience, one for Ambulatory and one for Acute.

On 12/14: APPs will select the new **Pediatrics View** in My Experience.

Current Mpage Selections

New Mpage Selection

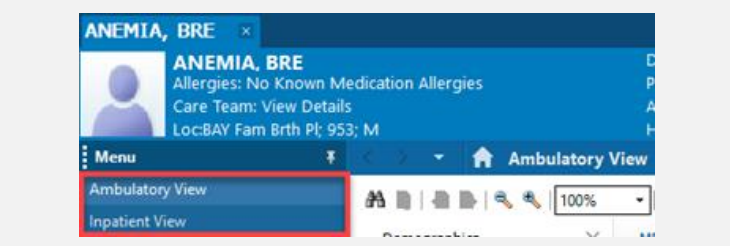

Viewpoints on Menu Bar

Currently: In the patient's chart, providers have to choose between the Ambulatory View and Inpatient View on the Menu Bar to see the desired workflow Mpages.

On 12/14: Providers will be able to see all workflow pages in one viewpoint called the **Provider View**.

Current Viewpoints

New Viewpoint

Mpage Views and Titles

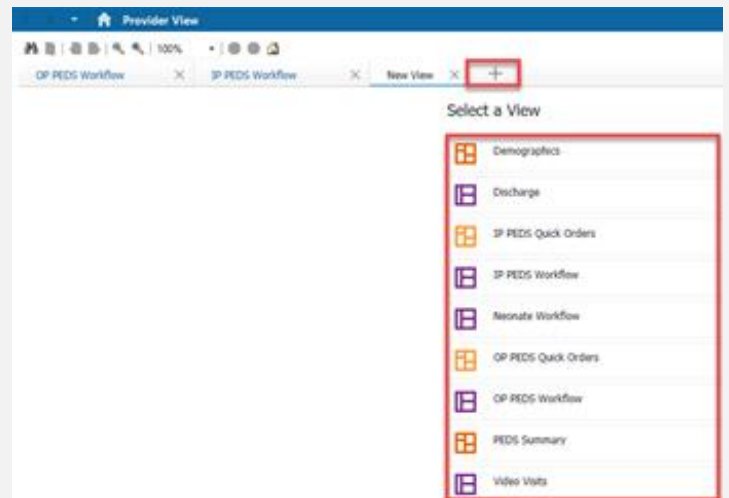

Currently: In the patient's chart, Providers have two sets of Mpage Views depending on which viewpoint is selected.

On 12/14: Providers will be able to see all Mpage views in one viewpoint called the **Provider View**. The Mpage titles/names have also been updated to ease the selection process.
