Ambulatory Stress Test – PowerPlan Name Change

Tuesday April 13, 2021

Nuclear Myocardial Perfusion Stress Test

Update: New Display Name effective 4/13/2021:

The Nuclear Myocardial Perfusion Stress Test has been renamed in PowerChart, making it easier for providers to search for and select the appropriate stress test order. When entering the word “Stress” into the search field, all the stress tests will be grouped together.

Old Display Name	New Display Name
 NM Stress Myocardial Perfusion	 Stress Myocardial Perfusion NM

Prior to this change: When entering the word *Stress* when searching for a stress test order, all of the stress tests did not display together making it more difficult for providers to locate the appropriate order.

- **Important Note:** If this PowerPlan was saved as a favorite, providers will receive a pop-up window to inform them that their favorited plan has changed. Follow the steps below to resave the PowerPlan and avoid the pop-up notification from displaying each time the plan is placed.

Positions Impacted: All Ambulatory Providers.

Resave PowerPlan Favorite

The PowerPlan favorite can be resaved while placing the order on a patient or while you are within any patient chart. To resave the PowerPlan favorite follow the steps below.

- 1) Select the PowerPlan order from your favorites list.

2) Click the **Orders for Signature** icon.

3) Click **Modify Details** in the Orders for Signature window.
