## Changes to PSO Order for Extended Recovery Patients All Physicians, Advanced Practice Providers, & Residents

For ease of functionality the PSO order when placing a patient in an extended recovery will now have both 'Extended Recovery' order and 'PSO Outpatient in a Bed' order linked and in its own group within the PowerPlan. As a requirement both these orders must be selected when placing a patient in an extended recovery status. Please review the below screen shots for the upcoming change effective **12/19/2022**.
