## **MModal Dictation after Cerner**

### **All Physicians and Providers who use MModal Dictation**

- New Cerner Documentation tools and workflows, including use of Dragon, will be replacing the majority of documentation that was dictated using MModal previously
  - Use of these tools, as covered in your Cerner classes, is the primary preferred method
- MModal will only be used during Downtime and to clean up old documents prior to January 29<sup>th</sup>, 2022.
- For Downtime documentation, MModal Preliminary Reports will route to your Message Center Inbox for editing and signature.
- MModal Preliminary Reports will route to your Message Center Inbox for editing and signature.
  - The signature process within Message Center is covered in Course 5605 in Promisepoint
- Current distributions of documents will follow the new ONE McLaren electronic process as detailed below.
  - Preliminary Reports from MModal and Dynamic Documentation in Cerner will be viewable electronically in Cerner.
  - Documents will be distributed upon final signature per One McLaren standard distribution settings for Primary Care, Referring Providers, and Authors depending on document type and service venue.
