Updates to Designated Care Partner/Family Notification Section Of Admission History Affected Areas: Acute Inpatient Nursing

CMS and JC require that patients be asked if they want us to notify their family of admission to the hospital. When the patient requests that their family be notified we must document who was notified. We have renamed and added additional documentation fields to the Designated Care Partner/Family Notification section of all Admsision History powerforms to facilitate this documentation.

1. In the Family notification section, you will be required to ask the patient-Do you want a family member notified of your admission?
2. If the patient answers “yes” the Family Member to Notify and Family Member to Notify Phone Number become required.

The screenshot shows the 'Admission History Adult - ZZTEST, WOUND' form. The left sidebar contains various assessment categories. The main content area is divided into two sections:

- Designated Care Partner:** This section includes a text field for the partner's name (highlighted in yellow), a contact number field (highlighted in yellow), and a relationship selection menu. A red box highlights the name field with the annotation 'Section renamed to Designated Care Partner'. To the right, there is a 'Refusal to Identify Care Partner' section with 'Yes' and 'No' radio buttons.
- Family Notification:** This section starts with a question: 'Do you want a family member notified of your admission?' with radio buttons for 'Yes' (selected), 'No', 'Unable to obtain', and 'N/A- Patient under 18 and Guardian is Present'. A red box highlights this question with the annotation '1'. Below this is a 'Family Member to Notify' text field (highlighted in yellow) and a 'Family Member to Notify Phone Number' text field (highlighted in yellow). A red box highlights the name field with the annotation '2' and 'Renamed to Designated Care Partner/Family Notification'. A red box highlights the phone number field with the annotation '(Best Phone #)'. To the right, a red annotation states: 'If patient answers "yes" then Family Member to Notify and Family Member to Notify Phone Number become required'.

3. With a 'Yes" response to notify family, nursing will receive a one time done/not done task.
