## Discharge M Page Updates All Providers

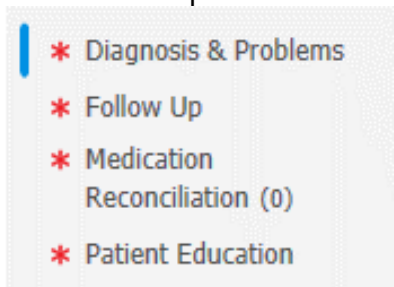

12/6/2022

On 12/6/2022, the Discharge M Page will be updated for all providers to reflect the following changes.

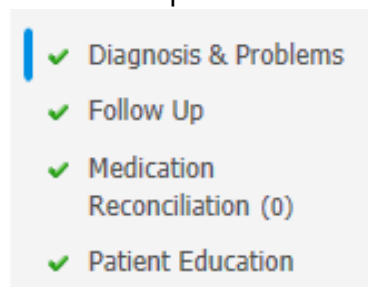

### Required Sections

All Discharge M Pages now have 4 sections that are required to be completed before a patient is discharged. The required sections are the Diagnosis & Problems, Follow-up, Medication Reconciliation, and Patient Education sections. Incomplete sections will display in the lefthand menu with a **red asterisk**, while completed sections will display with a **green checkmark**.

#### Incomplete

#### Complete

### New Access to Sections

All providers now also have access to the Hospital Course Free Text Field and Quality Measures sections.

### New Name for Section

The Assessment and Plan section will now be labeled as Diagnosis and Plan. This section is available for all providers regardless of specialty and contains Free Text Fields beneath each documented diagnosis for additional details.

### Creating Notes

Any notes created from the hyperlinks at the bottom of the Discharge M Page will pull the related information from the M Page into the note. The more details documented in the M Page, the more detailed the note will become.

*If you have any questions or concerns, please contact your local CIS Team.*
