Extended Recovery Pop-up Alert Impacted Area: Inpatient Nursing

To enhance the process for nursing to complete the Extended Recovery (ER) Stop Time, we have created an Extended Recovery pop-up alert that will remind the nurse to complete the ER task & form. As always, an Extended Recovery task will be on the task list for all ER patients. It is best practice if you receive the pop-up alert to return to the task list and complete the ER form from the task itself.

The Extended Recovery Alert will be received upon entering the patient's chart for the following scenarios:

1. When a patient status is changed from Outpatient in a bed, Extended Recovery to either Inpatient or Observation, the following alert will be triggered:

*Note: The nurse can access and complete the Extended Recovery form from the link in the pop-up window, however, they would then need to document the task as "not done" with a reason of "duplicate task" to clear it from the task list. It is best practice to document the ER stop-time from the task list to avoid duplicate work effort.

2. Discharge order is entered on a patient whose status is Outpatient in a bed, extended recovery. The following alert will be triggered:
