External Providers in Registration

When searching for a provider, please only select the "Internal" Search By criteria. **Do not use the "External" Search By criteria.** This selection is causing errors as the system is trying to pull providers in the system without the supporting build that supports clinical and billing workflows.

If a provider is not in the Internal database, please follow the Unavailable Physician workflow.

Selections when searching for a physician should look like this:

McLaren HEALTH CARE | *Doing what's best*
