Ambulatory: In-Office Eye Irrigation Task

December 10, 2021

Eye Irrigation Task Overview

Enhancement: When a Provider places an order for Eye Irrigation to be performed in-office, a task will fire to the Task List to notify clinical staff.

Prior to this enhancement, a task did not fire to the Task List to notify staff.

Position Impacted: Ambulatory Clinic Staff using the Single Patient/Multi-Patient Task List.
Eye Irrigation Task – Clinical Staff Workflow

1). When the provider places an order for the patient to have an eye irrigation in the office, a task will fire to the **Single-Patient** or **Multi-Patient Task List** to notify clinical staff:

   a. From the Task List, select the **Office/Clinic Task** tab.

2). Once the Eye Irrigation is complete, clinical staff can complete the task from the Task List by single-clicking the **Yellow Box** next to the task.

   • ***Note***: *There is no form associated with this task, the task is for notification purposes only.*

3). Click **OK** in the **Chart Done** window.

   • ***Note***: *The Date/Time field can be adjusted if needed.*

4). The task will now display with a green checkmark to indicate that it is complete.

   a. Click **Refresh** to remove the task from the Task List.
