

# CERNER FLASH

Ambulatory Provider - New FYI Result Subscription

Fri January 22, 2021

## New FYI Result Subscription Overview

New Result FYI Subscription **effective 1/22/21**:

**Ordering Providers** will have a new FYI subscription, **Ambulatory-Labs (non-Cerner McLaren)**, added to their positions within the Message Center. This subscription will allow lab results coming from a McLaren facility in another region that is **NOT** on Cerner to automatically route to their Message Center > Results FYI folder.

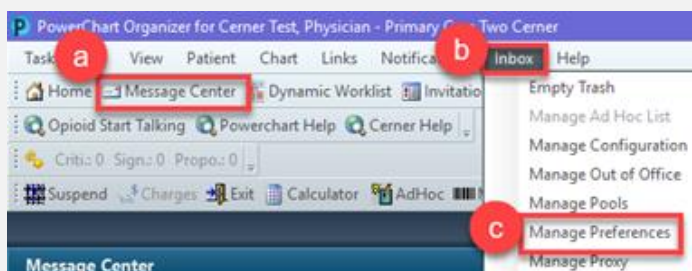

**Prior to this change:** If you ordered lab work within Cerner for a patient, and the patient went to a McLaren facility in another region that is **NOT** on Cerner yet, the results would post directly in the patient's chart without routing to your Message Center's Results folder.

**Positions Impacted:** All Ambulatory Providers (see complete list on pg. 2).

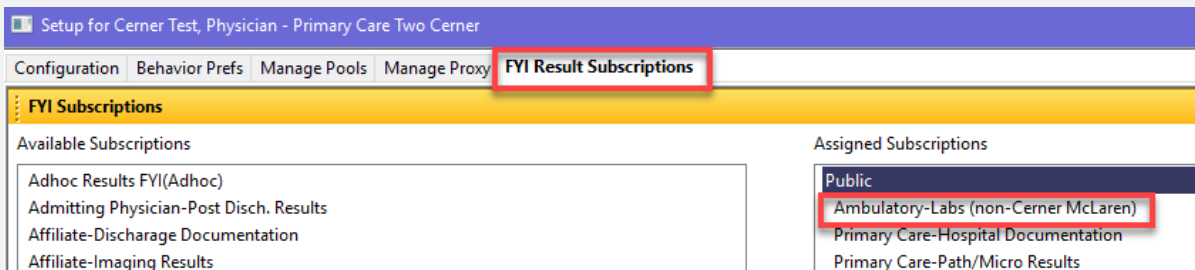

## New FYI Result Subscription

The **Ambulatory-Labs (non-Cerner McLaren)** result subscription is located within the Message Center as described below. **Users will automatically be opted into this subscription.** You can also opt into other subscriptions as desired.

- 1.) From the Toolbar:
  - a. Select the **Message Center** button.
  - b. Select **Inbox** from the Task Bar.
  - c. Choose **Manage Preferences**.

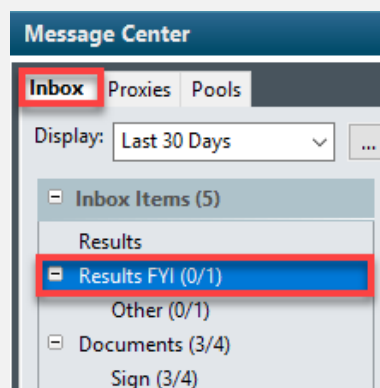

- 2.) From the **FYI Result Subscriptions** tab, users can see what subscriptions they are opted into under the **Assigned Subscriptions** column. Users can opt into other subscriptions as desired.

# CERNER FLASH

3.) Users will now see lab results from McLaren non-Cerner sites populate to their Message Center's **Results FYI** folder.
