One McLaren PathNet Order Catalog Activation

We are in the process of upgrading to a new lab system called "PathNet". This system will fully integrate with One McLaren Cerner and will provide positive patient identification at the point of care. On 3/20/2023 the new PathNet lab catalog was activated. You will see the new catalog as well as the old MLab (ALab) catalog until go-live on 6/3/2023.

During this transition period there are alerts built within Cerner to guide ordering providers in the event the wrong lab order is selected. Examples are shown below. All MLab orders are denoted with a proceeding (M). PathNet lab orders will appear without the (M) indicating that this order should only be used if the testing needs to occur on or after 6/3/2023.
