## \*Insurance Primary Tab - Required Touch

As of 5/17/22 we have pushed a change so that you **MUST** select the insurance primary tab in the PreReg, ED Modify, and Register Patient conversations. No other fields will be required, but it will require you to touch the tab prior to completing the conversations. We have made this change because when this tab is not touched within the registration conversations, encounters will not drive to worklists that are critical to timely notification and financial clearance. This will assist in preventing patients from being missed and loss of revenue.

In the conversation, this requirement can be seen by the asterisks next to the Insurance Primary Tab as shown below.

The screenshot shows a software interface with a horizontal tabbed menu. The tabs are: Patient Information, Encounter Information, Guarantor Information, \* Insurance Primary (highlighted in yellow), Insurance Secondary, and Insurar. Below the tabs is a section titled 'Address Information' containing three input fields: 'Address Info:' (a dropdown menu), 'Pt Phys Address - Clear (c):', and 'Pt Alt Address - Clear (c):'. A red asterisk is visible at the bottom left of the form area.
