Ambulatory: Message Center Summary View Enhancement

March 7, 2023

Message Center Summary View Enhancement Overview

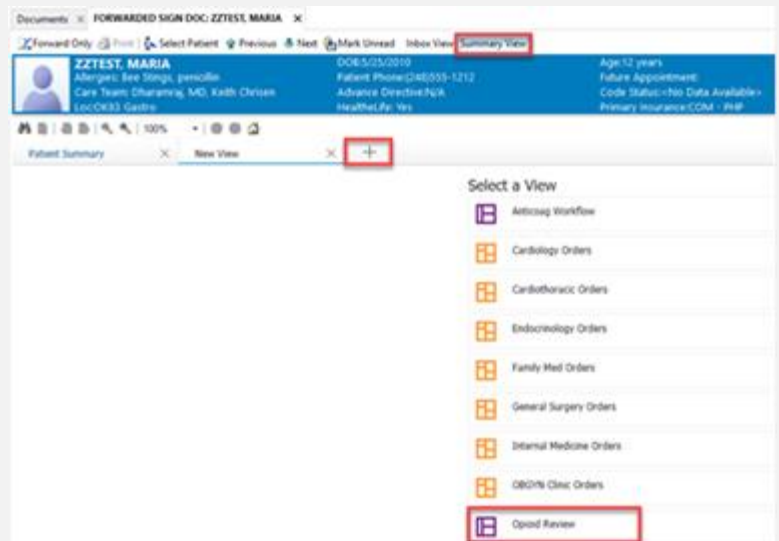

Enhancement: The Opioid Review page has been added to the Message Center Summary View. This will allow Providers quick access to Opioid Review component while working within the Message Center.

Prior to this Enhancement: The Opioid Review component/page was not available within the Message Center Summary View. Providers had to leave the Message Center and open the patient's chart to view the Opioid Review component.

Ambulatory Provider Positions Impacted: All Provider and Advance Practice Provider positions that currently have access to the Summary View within the Message Center.

Message Center Opioid Review Page

- 1) To access the **Opioid Review Page** within the Message Center:
 - a. From within the message, select the **Summary View**.
 - b. Use the **Plus +** icon to add the Opioid Review page if needed.

- 2) The Opioid Review Page will display and give Providers' access to the **Opioid Review** component.
