## Documented Medications by History - New Compliance Status

A new compliance status of **Still taking, SEE COMMENTS** is available in Documented Meds by History.

The screenshot shows a dropdown menu for 'Compliance' with the following options: 'Still taking, SEE COMMENTS' (highlighted), 'Still taking, as prescribed', 'Still taking, as prescribed, Need Refill', 'Still taking, SEE COMMENTS', and 'Not taking'.

This allows the person taking the medication history to highlight that the patient is taking the medication as prescribed, but there is additional information they want to convey. When using this compliance method, it is important to enter information in the compliance comments.

The screenshot shows the 'Compliance' form with the status 'Still taking, SEE COMMENTS' and a comment field containing the text 'Patient is taking each Thursday.'

The compliance and comments can be seen face up in the Documented Meds by History:

Order Name	Status	Details	Compliance Status	Compliance Comments
Last Documented On 3/20/2023 12:10 ED				
<b>Home Medications</b>				
cloNIDine (cloNIDine 0.1 mg oral tablet)	Documented	0.1 mg = 1 tabs, Oral, Q4H, PRN hypertension
