Addition of Telemetry Indication to Request for Admit / Bed Request

A required field will be added to the Request for Admit order in Cerner to indicate whether or not the patient needs a telemetry monitor. This will help capacity management determine where to place the patient and allocate monitors.

The screenshot shows a Cerner interface for a "Request for Admit / Bed FLT" order. The form includes tabs for "Details", "Order Comments", and "Diagnoses". Below the tabs are icons for a plus sign, a speech bubble, a bar chart, and a dropdown arrow. The form fields are as follows:

- *Requested Start Date/Time: 02/01/2022 (with up/down arrows) 1047 (with up/down arrows) EST
- *Location: Medical Unit (dropdown menu)
- *Telemetry: (highlighted yellow dropdown menu)
- Safety Concerns: (text input field)

Questions?
