

Change Coming April 22, 2020

Viewing Diet Orders on the Situation Background MPage

In an effort to streamline chart review and bring visibility to important aspects of patient diet needs, the Situation Background MPages have been enhanced. On the Situation Background MPage, there are 2 places diet information will display; the Visit Summary component and the Outstanding Orders component.

Keep in mind, the **Visit Summary** component can only display **ONE diet order** and will always only show the most recent order placed.

The **Outstanding Orders** component currently displays all active orders from predetermined categories. For those with the Situation Background MPage, this component currently displays all active patient care orders, labs, radiology, and consults. With this change **you will start to see all Diet/Nutrition orders here** as well. This will include diets, fluid restriction, tube feeding, and supplements. Since these orders are listed by date placed, you should scroll through all orders in this component to ensure you have viewed all the diet/nutrition orders that are active.

Shows single most recent diet order placed with details.

Scroll to view all active diet orders.

Order	Status	Ordered
Fluid Restriction	Ordered	04/16/20 11:17
XR Swallowing Function w/ Speech	Ordered	04/16/20 11:17
