iPods for Capacity Management: Setting up a PIN EVS & Transport

Users are experiencing issues getting locked out of the iPods with the new Cerner application. When attempting to unlock with a password, additional issues have occurred intermittently. To prevent these issues, end users can set up a PIN following the below workflow. Using the PIN to unlock your device should prevent these intermittent issues from occurring.

1. Click the #Lines Menu Icon, select Security Settings, then Create PIN

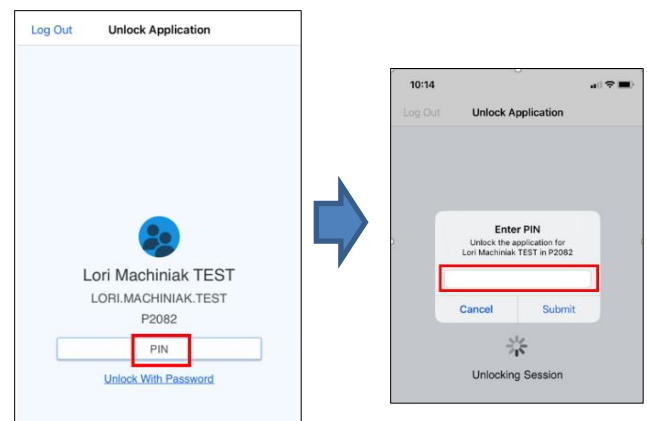

2. Enter a PIN and Click Create PIN, then click Done.

3. Now when the application is Locked you can use a PIN to unlock.

4. Enter Personal PIN and click Submit to unlock the device.
