

## Ambulatory - Message Center Summary View Enhancement

Tuesday July 6, 2021

### Message Center Summary View Enhancement Overview

**Enhancement:** The Anticoag and Quick Order pages have been added to the Message Center Summary View. This will allow Advance Practice Providers to access the Anticoag and Quick Orders page that they utilize while in the patient's chart.

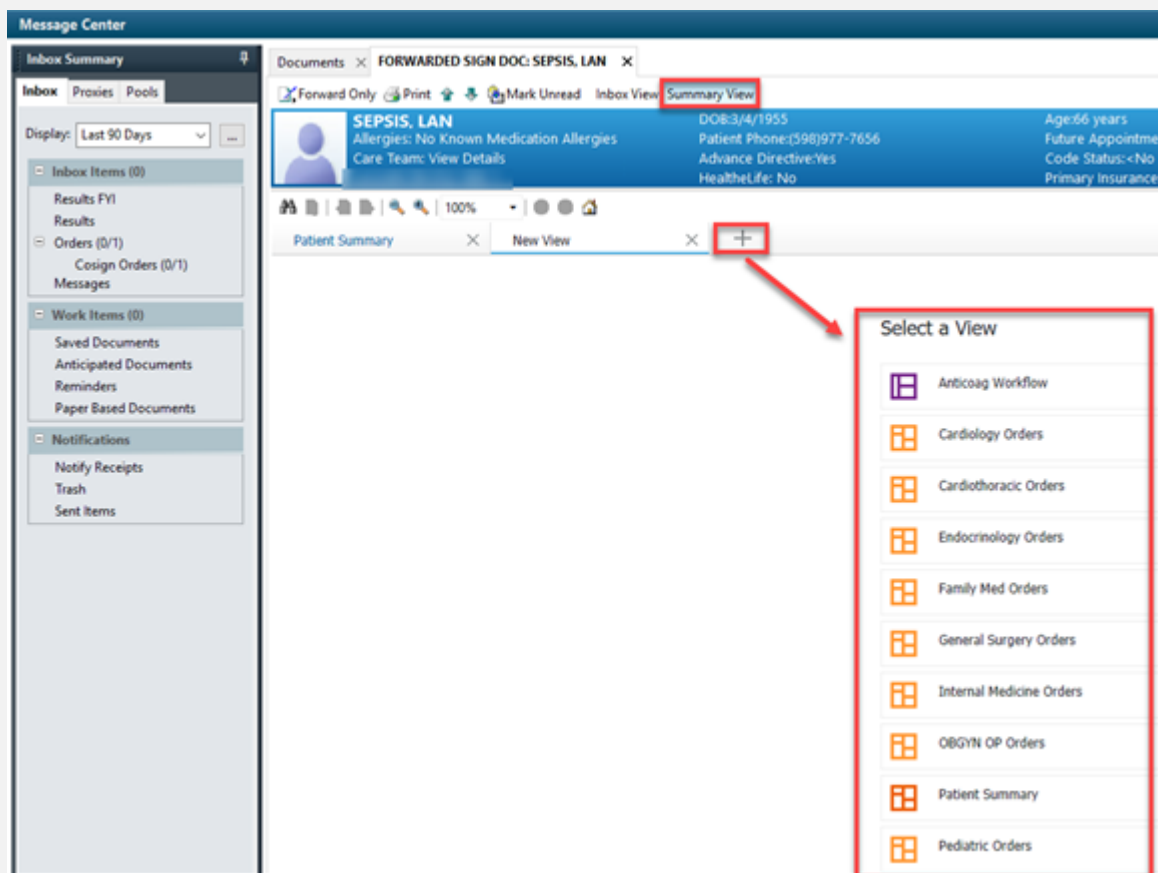

**Prior to this enhancement:** The Anticoag and Quick Order pages were not available for Advance Practice Providers.

**Ambulatory Provider Positions Impacted:** Physician Assistant and Nurse Practitioner.

### Message Center Anticoag and Quick Order Pages

1.) From within a message, select the **Summary View**.

a. Use the **Plus +** icon to add the appropriate Quick Orders page and Anticoag page if needed.

The screenshot displays the Cerner Message Center interface for a patient named SEPSIS, LAN. The interface includes a left-hand navigation pane with sections for 'Inbox Summary', 'Inbox', 'Proxies', 'Pools', 'Results', 'Orders', 'Work Items', 'Saved Documents', and 'Notifications'. The main content area shows the patient's summary with fields for 'Allergies', 'DOB', 'Patient Phone', 'Advance Directive', and 'HealthLife'. A 'Summary View' tab is highlighted in the top navigation bar. A red box highlights the 'Plus +' icon in the top navigation bar, which is used to open a 'Select a View' dropdown menu. This menu lists various views including 'Anticoag Workflow', 'Cardiology Orders', 'Cardiothoracic Orders', 'Endocrinology Orders', 'Family Med Orders', 'General Surgery Orders', 'Internal Medicine Orders', 'OBGYN OP Orders', 'Patient Summary', and 'Pediatric Orders'.
