

## Optimization Changes for ONE McLaren

On **August 12<sup>th</sup>**, there will be a change in EMR search and ordering for Nutrition Supplement and Tube Feeding items.

- The changes have been made in order to search for “like” items. This will allow viewing of all available products in one group location (similar to diet order searches).
- Products available for nutrition supplements and tube feedings will all be listed with “nutrition supplement” and “tube feeding” preceding the product name. A general search for product types will show all available products available to order for patients at that site.
- Screen shots shown below of the search option for these products.

The image displays two screenshots of the Cerner EMR interface, specifically the 'Orders Medication List' section. Both screenshots show a search bar with a dropdown menu of results. The first screenshot shows the search term 'tube feed' and the following results: Tube Feeding Glucerna 1.5 cal, Tube Feeding Jevity 1.2 cal, Tube Feeding Jevity 1.5 cal, Tube Feeding Nepro 1.8 cal, Tube Feeding Supplies Change, Tube Feeding TwoCal HN, and Tube Feeding Vital AF 1.2 cal. The second screenshot shows the search term 'nutrition sup' and the following results: Nutrition Supplement Ensure Clear, Nutrition Supplement Ensure Compact, Nutrition Supplement Ensure Enlive, Nutrition Supplement Glucerna Shake, Nutrition Supplement Juven, Nutrition Supplement Magic Cup, Nutrition Supplement Nepro Shake, and Nutrition Supplement Pro-Stat. Both dropdown menus are highlighted with a red border.
