

Ambulatory - Outpatient Workflow Lab Component Update

December 31, 2020

Outpatient Workflow Lab Component Update Overview

Enhancement: Effective 12/31/20, the Lab Component on the Outpatient Workflow Page will default to the Flowsheet view and list results by Result Date and Time, instead of Latest/Previous.

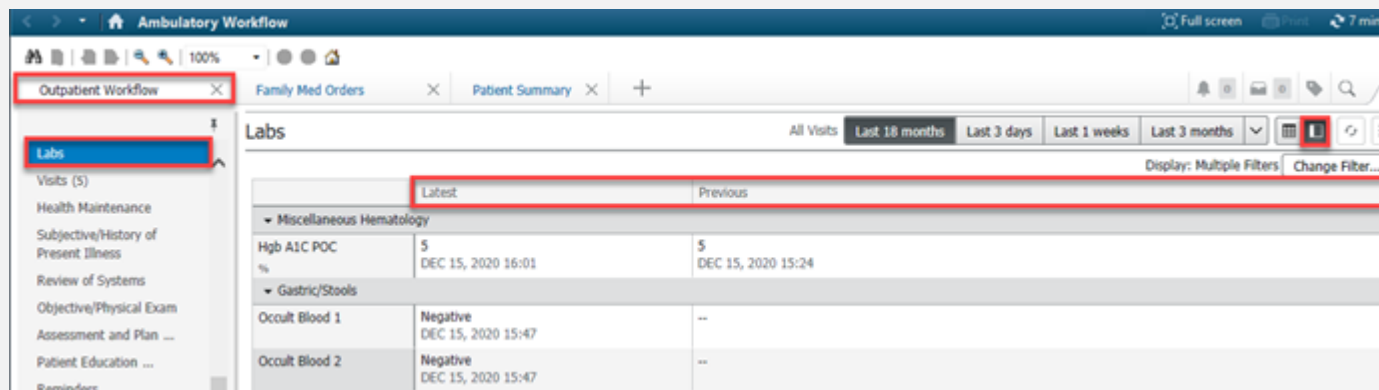

Positions Impacted: Ambulatory Providers and Mid-levels; Residents (see grid on page 2 for full list of positions).

Lab Component Default Display

The Flowsheet display will now default within the Lab component and list results by Date and Time.

- Note:** Users can always switch back to the previous display by selecting the icon in the upper right corner of the component.

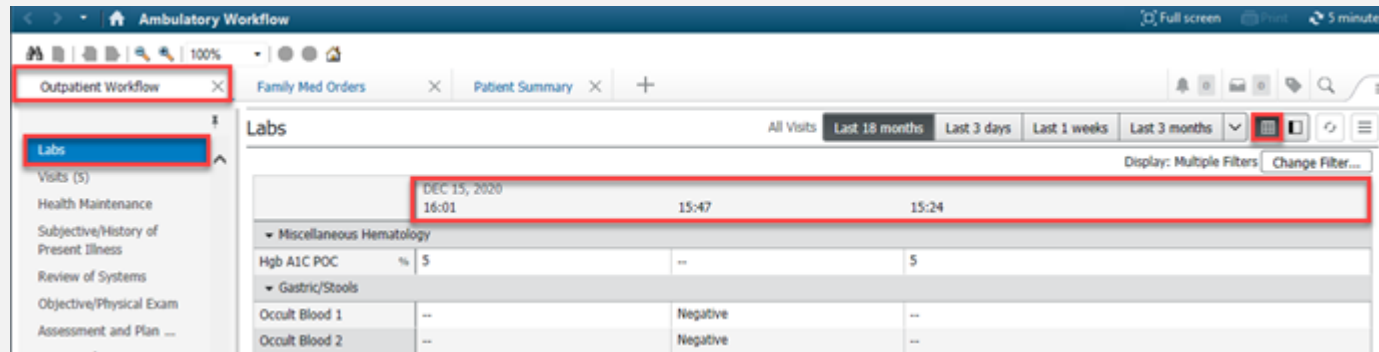

Old Default Display

The screenshot shows the 'Labs' component in the 'Ambulatory Workflow' interface. The table has two columns: 'Latest' and 'Previous'. The data is as follows:

	Latest	Previous
Miscellaneous Hematology		
Hgb A1C POC %	5 DEC 15, 2020 16:01	5 DEC 15, 2020 15:24
Gastric/Stools		
Occult Blood 1	Negative DEC 15, 2020 15:47	--
Occult Blood 2	Negative DEC 15, 2020 15:47	--

New Default Display

The screenshot shows the 'Labs' component in the 'Ambulatory Workflow' interface. The table has columns for Date and Time. The data is as follows:

	DEC 15, 2020 16:01	15:47	15:24
Miscellaneous Hematology			
Hgb A1C POC %	5	--	5
Gastric/Stools			
Occult Blood 1	--	Negative	--
Occult Blood 2	--	Negative	--
