Ambulatory - Single-Patient & Multi-Patient Task List Enhancements December 31, 2020

Task List Enhancements Overview

Enhancement 1: Effective 12/31/20, the tabs and columns located on the Single-Patient and Multi-Patient Task List will display in a more productive order and will default to the **Office/Clinic Task** tab when the task list is viewed.

Enhancement 2: Primary Care and Primary Care OB positions will now have access to the Multi-Patient Task List. Both task lists will display as described below.

Positions Impacted: Ambulatory Clinical Staff, Primary Care & Primary Care OB positions.

- *Important Note: Users will have to reset their Location and Timeframes on all task lists due to this enhancement.*

Task List Tabs and Columns

The tabs and columns on the Single-Patient and Multi-Patient Task List will display in a more efficient order.
