Release 8/29/2019

New Power Plans for Stroke

On 8/29/2019 the **New Stroke PowerPlans** developed along with the stroke coordinators and neurointensivist to ensure that we have all appropriate orders that route to the correct place and meet the needed quality metrics will be released.

The new sets will be in place and the old sets will be inactivated.

The new sets are:

Neuro Ischemic Stroke w/wo Alteplase (tPA) Admit Orders

Neuro Ischemic Stroke w/wo Alteplase (tPA) Focus Orders

Neuro Hemorrhagic Stroke Admit Orders

Neuro Hemorrhagic Stroke Focus Orders

Neuro Inpatient Activated Stroke Alert EKM

The sets with Admit Orders are for new strokes that need the admission orders as well.

The Focus Order Sets are for patients whose primary diagnosis is not stroke (i.e. their admission set is for pneumonia, CHF, etc.) or who have been admitted for another reason and develop stroke symptoms during their stay.

The alteplase (tPA) orders are available in subphases within the appropriate sets as an option when indicated.

The new sets for emergency medicine had previously been released.
